3.1 REPAIR SERVICES

Repair services are available to the Customer during the standard manufacturing equipment warranty period. This includes any repair or replacement of defective units during the stated warranty period. There may be additional charges during the warranty period for this service if customers are found to be returning a high level of NFF units, require advanced replacements, or send in a non-repairable unit. Prior to the warranty period expiring, customers may procure ongoing access to this support service through the purchase of an extended warranty program or through one of our AviatCare SLA support offerings. Otherwise the Repair service is made available for out of warranty products through a Per Incident billing process that can be enabled through our regional RMA Desk. See further details on how repair services are provided below.

All equipment under this specific Maintenance Level Agreement will be covered with our standard Repair / Replace policy. There is no limit to the number of units returned for repair but customer is subject to the same limitations for No Fault Found (NFF), damaged beyond repair units, non-returned Advanced replacement units where additional charges may apply:

- a) **Repair Center Support.** Customer shall place all RMA requests at the following link: https://aviatcloud.com/rma_tracking.asp. This link is available for use 24 hours a day, 7 days a week. Customers can also email or fax RMA requests to the appropriate Aviat Networks Repair Center. Aviat Networks will typically fax or email a confirmation with an RMA reference number within one (1) business day. Requests can also be made via telephone during such Aviat Networks Repair Center's Business Hours.

In order for Aviat Networks to process an RMA request, the customer must provide the following information:

- Company name;
- Shipping and billing address;
- Part Number;
- Serial Number of the defective unit(s)
- Unit software load;
- Description of the suspected failure;
- Whether any special requirements exist;
- Maintenance Level Agreement contract number (if applicable); and
- Provide a purchase order at the applicable price for billable requests. Billable requests include any request for express service regardless of warranty status. Contact your local Aviat Networks Repair Center for price information.

Important Note: The customer must include associated AviatCare Service Level Agreement (SLA) contract number in all correspondence(s) in order to avoid being invoiced for services falling within the scope of such Maintenance Level Agreement.

- b) **Turnaround Time.** Aviat Networks will provide a Turnaround time on repair as per the following:
- 20 Calendar Day turnaround time on Aviat Networks manufactured equipment
 - 45 Calendar Day turnaround on Aviat Networks Manufactured Discontinued equipment
- c) **Turnaround Time Calculation.** Turnaround time is measured from the time that a Returned Unit is received at the Aviat Networks Repair Center, which will be advised at time of issuing a RMA, until the time that it is shipped from the Aviat Networks Repair Center. Thus, the measurement of turnaround time does NOT begin when the Returned Unit is shipped from Customer's premises and does NOT include the shipping time accrued after the Returned Unit is shipped from the Aviat Networks Repair Center to Customer's premises. Additionally, Turnaround time will not be guaranteed in the following situations:
- If more than five (5) Units of the same type or more than ten (10) Units of any type are received at the same time.
 - Missing information such as failure details, return shipping address, shipping instructions and/or any other information that may affect the start of the repair process of the shipment of the Returned Unit as the repair completed.
 - Any Returned Unit is deemed No Fault Found.
 - Any Returned Unit received due to any of the reasons listed in the [Exclusions from Repair & Return](#) Clause of this Section.
 - Any Returned Unit received improperly packaged and therefore sustained physical or electrostatic damage in shipping.
 - Returned Units placed in Isolation.
 - Event of Excusable Delay as described under the [Excusable Delay](#) Clause of the Additional Terms & Conditions Section of this Agreement.
- d) **OEM.** For OEM, repair turnaround times are set by the OEM supplier. Aviat Networks close working relationship with OEM suppliers assures the best possible turnaround time. These times will be communicated to customer at time of RMA issuance.
- e) **Packaging and Shipping Procedures.** Both Aviat Networks and the Customer are obligated to ensure that all deliveries are packaged in such manner as to achieve suitable mechanical and environmental protection during storage, handling and transport to the delivery address. Electrostatic Discharge (ESD) precautions should be followed during handling and packaging of all Units delivered. For each consignment of Units shipped to Aviat Networks, the Customer must provide a detailed Packing List and Commercial (Proforma) Invoice to support the delivery. Each Commercial Invoice must clearly state the full description, the value of each Unit and the RMA Number. Once a Unit has been repaired and shipped to the Customer at the address provided by the Customer upon RMA request, Aviat Networks will send a pre-alert notification to the Customer comprising a faxed copy of the Commercial Invoice and Airway Bill Number pertaining to the shipment.
- f) **Exclusions from Repair & Return.** The services to be rendered by Aviat Networks under this Agreement shall not comprise any damage, defects, malfunctions or failures caused by one or more of the following:

- Damage caused by mishandling, customer or third-party negligence, abuse or operation outside the Aviat Networks environment specifications, or due to a cause not solely attributed to Aviat Networks.
- Modifications, alterations, or repairs made other than by Aviat Networks.
- Damages by persons other than Aviat Networks or its authorized service providers.

- Damage that occurs during shipment from the Customer premises to Aviat Networks' premises outside the RLP (if applicable).
- Installed, stored, used, handled or maintained contrary to Aviat Networks' written instructions.
- Used in conjunction or combination with third-party material or equipment without the consent of Aviat Networks.
- Units returned for repair where there has been misuse, neglect, power failures, surges, accident or acts of nature such as fire, lightning strikes or flood.

Repairs necessitated during the Agreement period by any of the above causes may be made by Aviat Networks, and the Customer shall pay Aviat Networks' standard charges for time and materials, together with all shipping and handling charges arising from such repairs.

- g) **Stockpiling of Failed Units.** The Customer agrees to obtain an RMA Number for all failed Units from an Aviat Networks Repair Center immediately following a failure and return the Units for repair immediately after receipt of the RMA Number from Aviat Networks. The customer agrees that this Agreement will not apply retrospectively to cover any Units failed and in the Customer's possession prior to the execution date of this Agreement, and will not apply to any Units for which RMA Numbers had already been obtained from Aviat Networks prior to the date of execution of this Agreement. Following execution of this Agreement the Customer agrees not to stockpile failed Units and accepts that Aviat Networks will not be required to meet the Turnaround Times outlined in this Agreement if the Units are not returned to Aviat Networks on receipt of an RMA Number or if they are stockpiled.
- h) **No Fault Found Fee.** If the number of Returned Units that the Customer reports are defective, but are thereafter tested by Aviat Networks and found to meet the applicable Aviat Networks Product specifications, exceeds ten percent (10%) of the total number of Returned Units received by Aviat Networks from the Customer during each year of the Support period, then Aviat Networks will charge the Customer the then-current [No Fault Found](#) inspection fee for each such non-defective Returned Units in excess of such ten percent (10%).
- i) **Damaged Beyond Repair.** Returned Units that Aviat Networks (in its sole discretion) determined are damaged Beyond Repair or have been repaired (or otherwise modified) by a party other than Aviat Networks will be placed in Isolation. The Customer shall be advised by fax or e-mail, within ten (10) days working days, of the nature and extent of the damage. The Customer shall be responsible for informing Aviat Networks of the next course of action. If the Customer decides to replace the Unit(s), they must follow the usual purchasing process. Note: If the Returned Unit is no longer in current manufacture and/or is OEM, Aviat Networks will not guarantee availability of a Unit for sale.

All Service Request Submissions will require Express PIN information prior to being submitted.

3.2.1 Service Request Severity Classifications

There are four (4) Service Request severity classifications: (a) Critical; (b) Major; (c) Minor; and (d) Inquiry. Critical, Major and Minor Service Requests pertain to problems in the Product. Inquiry Service Requests pertain to questions about the Product or Services. The four (4) Service Request severity classifications are defined as follows:

- a) **Critical Service Requests** are those that severely affect service, traffic, billing and/or maintenance capabilities, and require immediate corrective action (regardless of the time of day or day of the week).
- b) **Major Service Requests** are those that cause conditions that seriously affect Product operation, maintenance and/or administration, and require immediate attention. The urgency is less than in Critical Service Requests because of a lesser immediate or impending effect on Product performance, customer and/or network operation and revenue.
- c) **Minor Service Requests** are problems that are tolerable during Product use, do not significantly impair the functioning of the Product and do not significantly affect service to customers.
- d) **Inquiry Service Requests** are questions about technical details concerning the usage or behavior of the Product.

3.3 PROVISION SUPPORT 24 X 7

Aviat Networks shall provide remote technical support to the Customer on ProVision. The remote technical support 24 X 7 shall be provided as per the terms outlined in the Remote Technical Support 24 X 7 section of this Agreement.

Aviat Networks shall provide support on the current and previous ProVision production release and will investigate all reproducible product anomalies for the supported version. Customer Responsibility

To enable the Aviat Networks TAC to fully investigate ProVision issues, the Customer shall provide the TAC the appropriated logs and remote access where possible. The Customer will provide the capability to allow Aviat Networks to remotely access the Customer's network by means of a secure internet connection to the Customer's site. This connection process will need to be defined at time of agreement such that any issues arising after Agreement closure can be addressed expeditiously.

Exclusion from Provision Support 24 X 7

The services to be rendered on ProVision by Aviat Networks under this Agreement shall not comprise any services, which are required as a result of one or the more of the following:

- Customers using old versions of ProVision. The ProVision Agreement provides regular updates; customers are required to have the current GA release or the previous GA release installed and commissioned before they can obtain Aviat Networks technical support.
- Customer's lack of basic user training. It is expected that all users will have received basic user training when the ProVision system was installed.
- Network Planning; NMS Integration; Training courses; Installation and Commissioning; On Site Support. These are separate Aviat Networks service offerings, which are not delivered under this Agreement.
- Due to the complex nature of ProVision issues, which may be network related rather than ProVision related, not all Customer-defined level three product anomalies can be rectified within the commercial bounds in which Aviat Networks operates. Aviat Networks will require that all product anomalies are reproducible, prior to the commencement of any detailed fault analysis or potential product re-engineering.
